DEFICIENCIES CORRECTED

Copper Deficiency

Zinc Deficiency

Abiotic Stress

MODE OF ACTION:

Omex Zynergy delivers copper and zinc using OMEX EBA™ technology - a specially formulated complex that increases foliar uptake four to six times compared to standard applications. Copper activates enzyme systems linked to photosynthesis and cell wall binding; zinc regulates hormones governing root growth, water uptake and disease suppression. Together they reinforce the plant's natural defences & improve resilience to environmental stress.

ZYNERGY

Foliar Plant Health Promoter

OMEX | Caribbean chemicals GUYANA LIMITED

OMEX ZYNERGY

A unique complex of copper & zinc formulated to correct deficiencies, improve plant health and tolerance to abiotic stress throughout the growing season.

ENHANCED BIO-AVAILABILITY FOR SUPERIOR COPPER & ZINC UPTAKE

- Foliar plant health promoter with Cu & Zn
- Compatible with most crop protection programmes

HOW IT WORKS:

Omex Zynergy uses OMEX EBA™ (Enhanced Bio Availability) technology to deliver copper and zinc four to six times more efficiently than standard applications. It is absorbed rapidly through foliage and translocated to growing points, correcting deficiencies and strengthening the plant's natural defences against disease and abiotic stress.

BENEFITS OF ZYNERGY:

1. Corrects copper & zinc deficiencies rapidly
2. Improves plant health & vigor
3. Boosts tolerance to abiotic stress (drought, heat)
4. Synergistic with fungicide and bactericide programmes
5. 4-6 times more efficient uptake vs standard sulphate applications
6. Compatible with most herbicides, fungicides & foliar nutrients

NOT phytotoxic to crops at recommended doses

WORKS AGAINST:

LATE BLIGHT
(Phytophthora)

EARLY BLIGHT
(Alternaria)

RUST
(Puccinia Spp.)

DOWNY MILDEW
(Peronospora)

BACTERIAL LEAF SPOT
(Xanthomonas)

ANGULAR LEAF SPOT
(Pseudomonas)

Works synergistically alongside conventional fungicide & bactericide programmes for superior disease control.

CROP RECOMMENDED:

Omex Zynergy can be safely used on field vegetables, peppers, potatoes, cereals, legumes, soft fruit, tree fruit, vines, root crops, and protected salads & vegetables.

RATE OF APPLICATION

10-15ml per gallon
Repeat at 10–14 day intervals as required
